

Snow man directions

By Cury #6

The first thing is to click on the shapes and click on the circle.

Then you make the bottom circle big then make the middle circle a little smaller then make the top one the smallest then paint the circles blue.

Click on the face and click on the hand then turn it left then put it on left side of the body then make the same hand then turn it right and put it on the right side of the body. Then you get the skull and cross bones on the middle circle. Then you get the medal and put it on the middle circle on the other side. Then you get the bomb and put it on the left hand. Finally, get the sun glass and put it on the top circle.
